

Decision to Lease

DECISION

Approximately 299,556.40 acres of public lands (188 parcels) generally available for oil and gas leasing under Bureau of Land Management (BLM) land use plans were nominated for the oil and gas lease sale scheduled to be held on August 21, 2007.

Based on findings, determinations, and recommendations from the BLM, Utah Field Office Managers, I have decided to offer approximately 141,264.85 acres on 81 parcels of BLM-administered lands with appropriate conditions and stipulations.

RATIONALE FOR THE DECISION

The lands to be offered are identified by serial and parcel number on the attached list which identifies the specific conditions, terms, stipulations and notices applicable to each parcel.

All of the parcels have been reviewed to determine if existing planning and NEPA documents adequately address the issues and environmental consequences of leasing at this time. My decision to offer parcels is based on the findings and recommendations made in the relevant field offices' Determinations of NEPA Adequacy (DNAs) and modifications made by the Utah State Office Energy Support Team.

This decision also includes the offering of parcel UTU0507-085 located within the boundaries of the Vernal Field Office which was awarded to the high bidder at the May 22, 2007 lease sale, but the high bidder failed to make the required payment for the remaining bonus bid. The documentation to support leasing this parcel is contained in the administrative record for the May 22, 2007 lease sale.
